Supplier Capability Assessment

Screen and evaluate for quality and technical

To verify the safety and reliability of procured goods or equipment, buyers must be sure that Suppliers comply with quality requirements and have capabilities that manufacturing processes are in accordance with applicable standards and regulations.

In today's globally-linked world, international Suppliers and subcontractors provide products to clients thousands of miles away, making it difficult for foreign buyers to evaluate manufacturing processes taking place on different continents. We support you with Supplier and subcontractor audits designed to prove the reliability of both potential and current suppliers. Our on-site Supplier assessment services help you to ensure that your quality expectations and compliance requirements are met globally and along the entire supply chain.

As an independent party, our experts at Prima Strategic Group can make sure that the Supplier is able to deliver products which meet the required quality and are in conformance with applicable standards in the requested time.

SUPPLIER AUDIT PROCEDURE

A technical audit is performed as part of the Supplier assessment. This audit is conducted against client or project specific requirements and/or according to Prima Strategic Group's own assessment scope. In addition, an extended version of the Supplier audit can be performed that includes an assessment of the existing Suppliers' quality management system.

YOUR BENEFITS AT A GLANCE

Prima Strategic Group's Supplier capability assessment services offer you:

- Detailed information on potential and existing Supplier's capabilities.
- Special knowledge based on our long-standing history and experience.
- Extensive experience gained from international projects in numerous countries.
- Results which will be delivered in a Quality and Technical Assessment report.

OUR EXPERIENCE - YOUR BENEFIT

As one of the leading inspection, testing and consulting company located in THREE continents, with a global network of auditors and inspectors, Prima Strategic Group regularly conducts Supplier capability assessments for one of the world's largest Petro-chemical company LyondellBasell. Our experts provide technical advice on the early detection of potential problems, so issues and delays during the project execution phase could be avoided.

PREPARATION

Together with the buyer, we complete a technical questionnaire based on each supplier's profile, references, and a list of specific characteristics. Each questionnaire is based on but not limited to:

- Company profile and references
- Production range and process
- Production capability and capacities
- Resources
- Infrastructure and transport

DESKTOP AND ON-SITE ASSESSMENT

After thorough planning and coordination, our auditors assess the provided documentation and evaluate the following areas at Supplier sites:

- Supplier Responses
- Quality management systems Manual
- Organizational structures
- Personnel and qualification
- Manufacturing processes / standard operating procedures
- Workshop facilities and techniques

EVALUATION AND CERTIFICATION

According to the results of the Supplier audits, we provide a customized evaluation of qualification ranges based on a traceable and non-discriminating objective evidences in order to qualify suppliers according to their performance and outlining potential areas of weakness and bottlenecks. This evaluation report provides the following data:

- Suppliers range of qualifications according to their performance and objective evidences verified during visit
- Outline of potential risks during the upcoming pre-qualification phase
- Identification of areas of weaknesses and potential bottlenecks

CONCLUSION

Our experts prequalify global suppliers based on the evaluation matrix, preparing a bidder's shortlist of capable suppliers prior to purchase. Additionally, it is possible to identify sub-standard suppliers and give recommendations to help them improve quality to an acceptable level.

QUESTIONNAIRE PREPARATION

- ✓ Company profile
- ✓ Production range
- ✓ Resources and capacities
- ✓ Infrastructure and transport
